

Door Security

ELEGANCE DOOR SECURITY - OUR ELEGANCE DOORS ARE PROBABLY THE MOST SECURE DOORS THAT YOU CAN INSTALL IN YOUR HOME – AS EVERY DOOR IS MANUFACTURED AND INSTALLED TO POLICE APPROVED AND SECURE BY DESIGN SPECIFICATION.

For total peace of mind please take time to look at the videos of our door being submitted to the most rigorous testing ever performed on a door.

Not only did our doors pass the British Standard for high security but we tested it to breaking point and our elegance door withstood 3 times British Standard.

Now that's security you deserve in your home!

Multi-Point-Lock

Our door lock engages into position in multiple locations giving you protection against forced entry all along the lock side of the door

High Security Hinges

Our high security hinges with their high material content provide excellent protection against forced entry along the hinge side of the door.

Mdf Reinforced Panels

All door panels are reinforced with an mdf core as standard to provide extra strength

Break Secure Cylinder

Unfortunately, burglars have recently developed new methods of breaking into standard door lock cylinders. The high spec cylinders we fit to every door as standard are anti-drill, anti-snap, and bump resistant. We are confident that they are the best performing cylinders available today.
