

- **Complete Replacement of Old Fascias, Soffits and Guttering** - we remove all existing timbers and rainwater systems. By doing this you can say goodbye to rotten woodwork forever.
- **Guaranteed not to Dis-colour** - Our products carry a full 10 year guarantee against dis-colouration giving you total peace of mind.
- **Felt Treatment** - As part of your installation (wherever possible) we would recommend trimming back your existing roof felt and replacing it with our 'Jumbo Tec' upvc layer. This ensures that water is not soaked up out of your gutters and into your roof.
- **Vented Soffits** - Our vented soffits are specially designed to let air circulate through the soffit board and into your roof space. This is crucial to avoid the build up of condensation which can lead to rot and damp in your loft.

**Working at height regulations - if your installation is at first floor level or above, all work will be undertaken using scaffolding. This is a requirement by law under the "Work at Height Regulations 2005."**

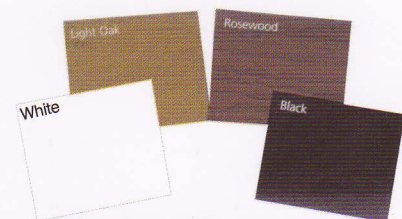

**Options available:**

Square, Ogee or Bullnose Fascia

Square or round gutter available in white, black or brown

Standard white or light oak, rosewood or black Fascias and Soffits
